# Education and work history

Greatest responsibilities during my time at Tamico Oy was managing data center, virtual environments and backup systems, working as technical support for sales and improving services.  
On customer service side I did everything from local support to L3-support and some projects.  
At Pihlajalinna I managed the server infrastructure and Microsoft365 and did cyber security work. I also implemented a monitoring solution.  
At Digia I worked with internal IT server infrastructure, Microsoft365 and Azure. Management, development and L2/L3 support.  
Currently I'm working at Sofor Oy as a system specialist working with customers' virtualization and Microsoft-technologies. I'm also part of the internal cyber security team.

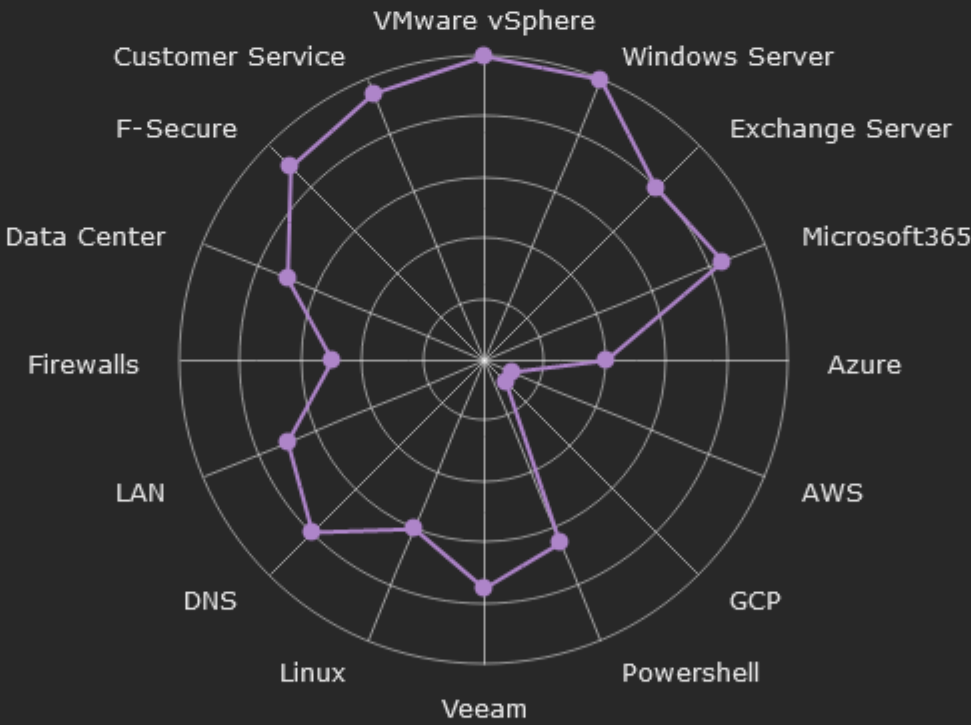

# Language skills

Suomi - Native  
Englanti - Excellent  
Google-fu - Excellent
